INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference PCT01-02059	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/JP2003/003311	International filing date (day/month/year) 19 March 2003 (19.03.2003)	Priority date (day/month/year) 25 March 2002 (25.03.2002)
International Patent Classification (IPC) or national classification and IPC H05B 33/04, H05B 33/10		
Applicant PIONEER CORPORATION		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 5 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☒ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 19 September 2003 (19.09.2003)	Date of completion of this report 29 January 2004 (29.01.2004)
Name and mailing address of the IPEA/JP	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP2003/003311

I. Basis of the report

1. With regard to the elements of the international application:*

- ☒ the international application as originally filed
- ☐ the description:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the claims:
pages _____, as originally filed
pages _____, as amended (together with any statement under Article 19
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the drawings:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the sequence listing part of the description:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP03/03311

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-12	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-12	NO
Industrial applicability (IA)	Claims	1-12	YES
	Claims		NO

2. Citations and explanations

Document 1: JP, 2002-25765, A (Kyushu Matsushita Electric Co., Ltd.), 25 January, 2002 (25.01.02)

Document 2: JP, 2000-68050, A (Casio Computer Co., Ltd.), 3 March, 2000 (03.03.00)

Document 4: JP, 7-211455, A (Idemitsu Kosan Co., Ltd.), 11 August, 1995 (11.08.95)

Document 5: JP, 9-161967, A (Motorola, Inc.), 20 June, 1997 (20.06.97)

Document 6: JP, 10-247587, A (TDK Corp.), 14 September, 1998 (14.09.98)

Claims 1-6, 8, 10 and 11

The subject matters of the above claims do not appear to involve an inventive step in view of documents 1 and 2 cited in the ISR.

Document 1 describes (1) a feature wherein a polymer compound film and an inorganic barrier film covering the said polymer compound film are used as a sealing layer of an organic EL display panel, and specifically, (2) a technology of forming "silicon nitride oxide" (claim 3) as the organic barrier film by means of "sputter or plasma CVD" (claim 6), (3) a technology of using "poly-pala-xylylene" as the polymer compound ([0043]), and (4) a technology of using a "plastic substrate" as the substrate ([0028]).

Document 2 (the claims, [0013]-[0018] and figures) describes a feature wherein an organic protection film composed of a poly-pala-xylylene resin is formed for a sealing layer of an organic EL display panel by means of CVD, and the edge parts of the organic protection film and the surface of the substrate around those edges are covered with an inorganic film.

It would have been obvious to a person skilled in the art to apply document 2 to document 1.

Claim 7

The subject matter of claim 7 does not appear to involve an inventive step in view of documents 1, 2 and 5 cited in the ISR.

An over-coating layer in document 5 corresponds to an inorganic barrier film on the side of the substrate in claim 7 of the present application.

It would have been obvious to a person skilled in the art to apply documents 2 and 5 to document 1.

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of : V

Claim 9

The subject matter of claim 9 does not appear to involve an inventive step in view of documents 1, 2 and 6 cited in the ISR.

Document 6 (claim 1, claim 4, [0079]-[0087] and all figures) describes the edge of sealing layer of organic EL display panel is formed in a tapered shape.

It would have been obvious to a person skilled in the art to apply documents 2 and 6 to document 1.

Claim 12

The subject matter of claim 12 does not appear to involve an inventive step in view of documents 1, 2 and 4 cited in the ISR.

Document 4 ([0024]-[0027]) describes (1) a feature wherein an electricity-insulating polymer is used for a sealing layer of an organic EL display panel, and (2) a plasma polymerization method or a plasma CVD method as a method for forming film of the said polymer.

It would have been obvious to a person skilled in the art to apply documents 2 and 4 to document 1.
